SPLASSIVE

THE SPLASH NETWORK

SPLASH NETWORK IS THE LATEST PROJECT DEVELOPED BY Splassive Team.

The official token of the SPLASH NETWORK is SPLASH on the AVALANCHE SMART CHAIN (AVAX) that captures value by being scarce, deflationary, censorship resistant, and by being built on a robust, truly Decentralized blockchain.

The recommended exchange for trading splash is THE WELL contract which can be found directly on the platforms website which provides the lowest prices and highest liquidity, resulting in less slippage for larger trades. For other exchanges, such as PancakeSwap, it is recommended to always cross-check the token address against the splash address provided on splassive.com as there are many scams and fake splash tokens currently being listed. Splash can be deposited into splash's the tap contract to provide a consistent 2% daily return (up to 360% of initial principal amount) for participation over time. Additionally, players can add their wbnb into the shore contract to become a permanent liquidity provider for splash and earn wbnb rewards indefinitely from multiple dividend streams and income generated from Exchange fees. Splash is the only deflationary daily ROI token that pays stakers and referrers from a tax on transactions and not through inflation!

THE TAP

The splash network's the tap is a low-risk, high reward contract that operates similarly to a high yield certificate of deposit. Players can participate by purchasing splash from the platform's swap page, joining another user's Splasive team (10 splash minimum requirement) depositing splash to the tap contract earns a consistent 2% daily return of their splash (360% maximum payout) passively. Players can also compound their earnings through regular deposits, rolling rewards as well as team based referrals. Unlike many other platforms promising a consistent daily % return, the tap's contract cannot drain and will always be able to provide the splash that has been rewarded. Splash rewards come from a 10% tax on all splash transactions excluding buys from the platform's swap page. If there is ever a situation where the tax pool is not enough to pay splash rewards new splash will be minted to ensure rewards are paid out. Given the ingenious game theory behind the splash network, the probability that the system will need to mint new splash to pay rewards is extremely low. Since splash deposited into the tap are sent to a burn address and splash is constantly being locked in the liquidity pool through the shore contract, splash is the only deflationary daily ROI platform. The best strategy for splash is to focus on real world adoption by building out your team through direct referrals, as you will receive bonus rewards from referrals on their deposits and downline bonuses from players, they refer based on the amount of WAVE held in your wallet (see section titled 'referral system/reward structure' for more information). By doing so, you will dramatically accelerate your Roi period and allow your team's chain to grow out organically. Not only are players able to passively increase their splash holdings in the tap through participation over time, but the tap also incentivizes players to participate actively by providing lucrative referral rewards for holding WAVE in their wallet and building out their team. There is also an airdrop feature which is a great way to ensure that your account is in positive net deposit value standing, give back to your team, and also build up referrals through frequent giveaways.

“Compound interest is the 8th wonder of the world He who understands it, earns it: he who doesn't, pays it. ALBERT EINSTEIN

The tap's compound mechanism uses your current available splash dividends and redeposits them into the tap contract, compounding your long-term earnings by increasing your daily cash flow and also by increasing your max pay-out. There is only a 5% tax on compounding transactions instead of the 10% tax that is put on other splash transactions. This 5% tax goes into the tap pool that is used to pay daily ROIs and referral bonuses. The splash from this tax is also paired with AVAX from the shore liquidity staking contract and locked in the splash-AVAX liquidity pool.

Splash can be deposited into splash's the tap contract to provide a consistent 2% daily return (up to 360% of initial principal amount) for participation over time. Additionally, players can add their AVAX into the shore contract to become a permanent liquidity provider for splash and earn AVAX rewards indefinitely from multiple dividend streams and income generated from exchange fees. Splash is the only deflationary daily ROIs token that pays stakers and referrers from a tax on transactions and not through inflation! Net deposit value = (deposits + airdrops + rolls) - claims

THE ONBOARDING SYSTEM

In order to successfully make a deposit into the tap staking contract, you will first need to join someone else's team by either clicking their referral link or by manually adding their wallet address into the buddy referral system (minimum requirement 10 splash). In order to receive referral rewards, players must hold WAVE in their wallet and the depth of the rewards received will be determined by their individual WAVE tier requirements. In addition, accounts must have positive deposit status for direct referral bonus rewards as well. Not only will you get bonuses from your downline referrals, but you will also get a 2.5% deposit/compounding bonus when you deposit under a "team wallet" which means someone who has 5 or more direct referrals. A rate sheet is included below for how much WAVE must be held to receive 10% bonus rewards on deposits from your downline.

If an account is not net positive when the player in their downline deposits, or if they do not hold enough WAVE to receive referral bonuses at that level of downline or they were the last person to be credited with a referral bonus from that player, the bonus will go further upline until it hits a player who is eligible for the referral bonuses. Using this round robin system, we have eliminated the incentive for self-referring and other bad behavior which is used to leech referral systems, while still greatly rewarding team building through referrals! If a player plays like a solo player, they will not get team Based rewards. Rewards are paid as a direct deposit. This will directly and immediately enhance longevity of the platform and also promote long term team building. The WAVE tier requirements for downline referral bonus are as follows...

Downlines accessible	WAVE in wallet
1	5,000
2	10,000
3	20,000
4	30,000
5	40,000
6	50,000
7	60,000
8	75,000
9	85,000
10	100,000
11	110,000
12	120,000
13	135,000
14	190,000
15	200,000

WHALE TAX

TOTAL SUPPLY %	TAX %
< 0.99%	0
> = 1%	5
> = 2%	10
> = 3%	15
> = 4%	20
> = 5%	25
> = 6%	30
> = 7%	35
> = 8%	40
> = 9%	45
> = 10%	50

We have added a whale tax on withdrawals to help curve whales' ability to outpace other players in the game, forcing them to kick back some of their rewards to the community and maintain the sustainability of the project! The tax goes as follows, and does not apply to anyone below these staked holdings.

08 THE WELL

THE WELL is the splash network's solution for players that want benefit from noninflationary Yield farming through adding liquidity to SPLASH. Players can participate by adding AVAX to the shore Contract to earn passive perpetual AVAX rewards, while also providing locked liquidity to the SPLASH ecosystem! AVAX Rewards are paid out instantly and through a persisting SPLASH protocol from the dividend pool.

THE WELL helps provide long-term price support and an ever-rising potential price floor, as permanently locked liquidity is added to the SPLASH token on the splash network's Swap exchange. Not only are players able to receive perpetual AVAX dividends using THE WELL, but THE WELL ensures that the floor of liquidity for SPLASH is hardened, providing permanently locked liquidity and long-term price support. When you enter the shore contract you are swapping AVAX for a token called DROP that is held by the shore contract and represents your share of the SPLASH/AVAX liquidity pool. Drop will not fluctuate in value and is pegged 1:1 with $\text{SPLASH} \times \text{AVAX}$ (SPLASH's native liquidity pool token).

The amount of DROP held by a player determines their share of the dividends that they will receive from the shore's instant and daily dividend pools. When you swap AVAX for drop and vice versa there is a 10% tax that is used to pay AVAX rewards to people in the shore and lock liquidity in the SPLASH-AVAX liquidity pool. 2% of the AVAX used to buy drop is immediately distributed to people in the shore, 5% goes into the shore pool which pays out 2% of its balance every day to people in the shore, and 3% is permanently locked in the SPLASH liquidity pool! Your share of the shore will fluctuate overtime; decreasing as more DROP are purchased by other players. You can always increase your Share by compounding or purchasing more drop. We have also implemented a 1% fee on SPLASH-AVAX swaps and this fee goes into the shore dividend pool that is distributed daily proportional to players Drop holdings. This creates an additional stream of AVAX into the shore contract which is not dependent on more people Buying drop by entering the shore!

ROADMAP

The splash network is a complete, fully functional and sustainable project. In the weeks following the launch of SPLASH multiple development updates are ready to be pushed which will keep excitement building and give investors plenty to look forward to! Below are just a few layers of development that will be pushed after launch! To maintain an intellectual advantage over our competition the details of these updates are kept secret, however you can rest assured, we have a lot up our sleeves!!

- **Splash pre-sale - WHITELIST ONLY**
- **Splash LAUNCH - 24-48 hours after pre-sale**
- **Splash NFT game - 2-3 weeks after launch**
- **Splash Farm will also be launched within game**
- **Splash DAO- 2-3 weeks after launch**
